

ROLEC edicts

We are serious about law edicts and environmental conservation. As explained in the sustainability section, protecting the environment and the use of sustainable resources are extremely important to us. That is why we ensure strict compliance with all legal requirements. Learn more about ROLEC's Statement in Regards to Conflict Minerals, REACH and RoHS compliance [here](#).

RoHS

Directive 2011 / 65 / EU „Reduction of hazardous substances“ (RoHS)

Safety and transparency with the selected material ROLEC Gehäuse-Systeme GmbH follows all of the standard rules and legal requirements in selecting materials. All standard ROLEC products exclusively use products complying with Directive 2011 / 65 / EU „Reduction of hazardous substances“.

It stipulates that, since July 1st 2006, only electronic equipment may be brought to the market in certain product categories that are free of certain hazardous materials.

This particularly applies to lead, quicksilver, chrome-6, polyprominated biphenyle (PBB) and polybrominated diphenyl ethers (PBDE). Rolec's product palette has been RoHS-compliant since May 1st 2005.

Tailored to the special requirements in certain sectors and our customers' core competences, we deliver custom-made solutions that can deviate from our standard products. This guarantees that everyone who places an order will receive the highest level of safety and complete transparency in the composition of high quality ROLEC enclosures.
